Personal Details

Date of Birth: 08/11/1992

Nationality: Indian

Marital Status: Married

Visa Status: B1 Visa holder

Skills

- Programming Languages:** Java, Python (Basic), TTCN
- Automation Tools:** Selenium, Appium, TestNG, REST Assured, BrowserStack, JMeter
- Defect Management Tools:** JIRA, Linear,
- Databases:** MongoDB, MySQL, TimesTen

Results-driven QA Engineering Manager specializing in test automation, API quality, and system-level validation across microservices-based platforms. Skilled in building hybrid automation frameworks (UI + API), optimizing regression cycles, and embedding QA early in design and development. Experienced in handling large-scale rollouts, pilots, and cross-functional stakeholder alignment for high-visibility programs. Passionate about building strong QA culture, mentoring teams, and delivering measurable impact through engineering-led quality. Skilled in managing QA roadmaps, driving adoption of tools & data-backed quality metrics.

Work History

2024-04 - Current	Engineering Manager - Quality Assurance <i>GreyOrange, Gurgaon, India (Remote)</i> - Lead a team of 5 QA engineers, fostering collaboration and efficiency. - Spearheaded the development and implementation of automation frameworks, reducing regression testing time by 60%. - Overseeing complete release cycles to ensure timely and efficient delivery. - Collaborated with cross-functional teams to define acceptance criteria and freeze the scope of requirements. - Acted as the first POC from P&E for production issues, driving root cause analysis and corrective actions.
2022-07 - 2024-03	Senior QA Engineer - II <i>GreyOrange, Gurgaon, India (Remote)</i> - Designed and developed automation frameworks using Appium, Java, and TestNG. - Integrated automation with external platforms like BrowserStack and Slack, enhancing communication. - Implemented GitHub Actions for regression testing, improving efficiency and stability. - Led a team of 4 QA engineers to maintain product quality standards.
2019-05 - 2022-07	Sub System Architect <i>Ericsson India, R&D, Gurgaon, India</i> - Utilized Java for software development and TestNG for basic tests, contributing to the reliability and functionality of SDP (Service Data Point), a prepaid charging and billing product - Designed tools for network dimensioning, streamlining

- **Version Control & CI/CD:** Git, Gerrit, GitHub, Github Actions, Jenkins
- **Development Tools:** Eclipse, Cursor
- **Test Case Management System:** TestRail
- **Other Tools & Platforms:** Slack, Postman, Maven, Android Studio, Testflight, Google cloud
- **Management skills:** Team building, Training and mentoring, Goal setting, Strategic planning, Shift Left Testing, Agile Methodologies

2018-11 -
2019-05

Quality Assurance Engineer

Amazon, Bengaluru, India

- Tested Amazon Music's search functionality using Selenium, enhancing user experience.
- Created comprehensive test plans for voice and text-based search functionalities.

2014-08 -
2018-11

Senior Software Engineer

Ericsson India, R&D, Gurgaon, India

- Conducted functional testing using TTCN, contributing to SDP reliability.
- Played a key role in code reviews, ensuring quality and adherence to best practices.
- Conducted analysis and proof of concept POC for product customization of SDP, contributing to product versatility.

Education

2014-05

B.Tech, Electronics and Communication

Vellore Institute of Technology, Vellore - Vellore

Grade: CGPA 8.13/10

Accomplishments

- Part of the team that won the "**Best Team Award**" two years in a row.
- Won "**Ace Award**" twice at Ericsson for outstanding performance.
- Built projects from scratch, meeting tight deadlines through risk-based testing.
- Improved team efficiency by **30%** via process automation and streamlined workflows.
- Designed and implemented a Test Control Management System (TCMS), contributing to streamlined processes and improved project outcomes.
